

Thermaset

finishing compound

Description - Self setting cement for use as a weatherproof protective coating over thermal insulation.

General Information

Applied Density -

1200kg/m³

Appearance -

Grey/Pink powder

Wet Covering Capacity -

150 sq m (1000kg at 5mm thick)

Product Form -

Product is available in 25kg heavy duty polythene sacks.

Product Application -

The material is suitable for application to thermal insulation of various types and sets without the application of heat.

Thermaset produces a robust surface layer, resistant to weather, impact and abrasion damage.

The above information is a summary of typical performance under test conditions and due to variables on site should not be regarded as a form of product guarantee.

Typical Product Performance

Product standard:-	BS 3958: Part 6
Flexural strength:-	3000kN/m²
Temperature limits for continuous service:-	200°C
Combustibility:-	Non Combustible
Dry state shelf life:-	6 months

EN ISO 9001:2000
